PROFILE

Hi,

I'm deeply passionate about technology and web development. I'm constantly on the lookout for new learning opportunities and strive to outdo my personal bests. With a strong foundation in Angular, React, HTML, CSS, Bootstrap, JavaScript, TypeScript, NodeJS. I thrive on solving problems and creating meaningful solutions.

WORK EXPERIENCE

Software Developer

Social Tech Projects ApS | Aug 2022 - Mar 26 | Copenhagen, Denmark

- Frontend development of WeSolve and Tapsy, web applications using Angular, Typescript, and Less and ensuring a seamless user experience
- Developed a full-stack web application for a project called Road Winter System, using React, JavaScript, and Node.js, integrated with IoT devices via MQTT.
- Improved code quality through rigorous testing and code reviews.
- Software development, testing, debugging, documenting and monitoring.
- Interacting with different departments within the organization regarding new deployments
- UX/UI and enhancements recommendations to software applications

Frontend Developer Intern

Social Tech Projects ApS | Apr 2022 - Aug 22 | Copenhagen, Denmark

- Contributed as a Frontend Developer for a web application where the citizen can send feedback , complaints or propose ideas on how to improve the public transportation and services
- Developing user-friendly interfaces using Angular and Typescript, and ensuring seamless interactions by following the agreed design in Figma.
- My personal achievement of this project was to be able to help developing the web application by using and learning Angular and Typescript.
- The experience was all in all meaningful for me because I was developing a real solution that could improve and grow sustainability in the targeted city, while also developing my skills as a frontend developer.

Packer

Løgismose Meyers ApS | Dec 2018 - Apr 2022 | Hvidovre, Denmark

- Packing bread and sweets
- Ad-hoc tasks fx. helping with making sweets and bread
- Manipulating pallets with a forklift

Team Leader

DataMondial S.R.L. | May 2011 - Jun 2018 | Galati, Romania

- Team leader for the testing team.
- Proposals for improvement of the work application, that could lead to a higher productivity and quality.
- Setting the bases for new clients by establishing the work instruction according to the clients needs and testing the work application.
- Reporting error in the work application to the IT department from Netherlands.
